The Joint Commission

FEBRUARY 9, 2024

SUBJECT LINE: CY2022 QRDA-I FILE DELETION FROM DDSP SERVERS EFFECTIVE 4/12/2024

Dear Colleague,

The purpose of this communication is to inform you that the Joint Commission will be deleting CY2022 QRDA-I files from the DDSP servers effective 4/12/2024.

Once the CY2022 QRDA-I files have been removed from the DDSP, users will not be able to view patient level data in the Source Viewer and Logic Explorer debugging tools accessible via the magnifier icon. In addition, the magnifier icon on the Upload Data - Upload Summary page will not function.

This will not affect DDSP users' ability to view/download their CY2022 Data Submission Reports from the Home page, Patient Result detail report on the Quality Improvement page, or Error and Warning report on the Data Accuracy page.   In addition, there is no impact to submitted data saved in the DDSP database.

Hospitals that would like to review their CY2022 eCQM data in Source Viewer or Logic Explorer for debugging purposes need to act before Friday, April 12, 2024.

Please note, moving forward, QRDA-I files for each annual submission will be removed 6 months after close of the submission period. Therefore, 2023 QRDA-I files will be removed in September 2024.

Note that the 2021 QRDA-I Files have already been removed and while the DDSP debugging tools to review these files cannot be used anymore, however, the Patient Result detail reports, Error and Warning reports, Data Submission Reports, and the dashboard views are available.

If you have any questions, please submit a support ticket via the "Need Help?" button on the DDSP.

Thank you
